30 prompts to work better with AI

Copilot, Chat GPT Plus and Claude: ready-to-copy instructions for Excel, reports, contracts, meetings and career.

How to use them. Copy the prompt, replace the parts in [square brackets] with your situation and paste it into the tool you use. The tool suggestion is only a hint: you can try the same prompt on all three and compare the answers.

1. **Give context.** Who you are, who you are writing for, what the situation is.
2. **State the goal.** What you want to achieve and by when.
3. **Ask for a format.** List, table, email, one page, number of points.
4. **Always check.** AI can be wrong: numbers, names and clauses must be verified by you.

Confidentiality. Do not paste personal data, contracts or confidential documents into an AI tool without checking the security rules of your company and of the tool. If needed, replace names and figures with placeholders.
